

AetherPay Platform

API Requirements & Third-Party Integrations Document

This specification details the essential third-party service credentials and API keys required to launch the AetherPay Mobile Recharge and Bill Payment Platform. To operationalize this platform in production, the client must establish merchant accounts with the providers specified below and configure the matching credential keys.

1. Core Business APIs (Recharge & Utility Payments)

AetherPay supports switchable routing configs. You must register for at least one of the following aggregators to enable prepaid recharges, DTH, and utility bill payments:

Aggregator API	Credentials Required	Purpose & Description
Recharge1 (Default)	- RECHARGE1_MEMBER_ID - RECHARGE1_API_PASSWORD - RECHARGE1_BASE_URL	Processes mobile prepaid recharges, DTH, and utility payments. Recommended default.
Pay2All (Alternative)	- PAY2ALL_API_KEY - PAY2ALL_BASE_URL	Primary fallback API switch to process prepaid and DTH recharges.
BillBox (Alternative)	- BILLBOX_API_KEY - BILLBOX_BASE_URL	Enables backup BBPS utility payment routing switches.

2. Platform Services (Auth, Payment Gateway, Comms)

These APIs handle payment collections, user registration OTPs, transaction alerts, and notifications:

Service Type	Required Keys & Credentials	Purpose & Description
Razorpay (Payment Gateway)	- RAZORPAY_KEY_ID - RAZORPAY_KEY_SECRET - RAZORPAY_WEBHOOK_SECRET	Enables users to add money to their digital wallet securely via UPI, Cards, Netbanking.
MSG91 (SMS Gateway)	- MSG91_API_KEY - MSG91_SENDER_ID - MSG91_TEMPLATE_ID	Sends DLT-compliant mobile OTP authentication codes during signup/login.

Firebase (FCM) (Push Notifications)	• FIREBASE_SERVICE_ACCOUNT_KEY (Service account JSON payload)	Delivers instant push notifications to Android and iOS devices for transactions.
SendGrid (Email Services)	• SENDGRID_API_KEY • SENDGRID_FROM_EMAIL • SENDGRID_FROM_NAME	Emails transaction receipts, monthly ledger statements, and security reports.
Cloudinary (Cloud Storage)	• CLOUDINARY_CLOUD_NAME • CLOUDINARY_API_KEY • CLOUDINARY_API_SECRET	Stores promotional banners, operator logos, and user profile pictures.
